

The Board of Education members and administration want to thank the people who completed the transportation survey at the budget vote. We had 74 responses. The survey results showed:

- 48.6% of the people taking the survey felt that the district should consider building a new bus garage.
- 28.4% of the people felt that we should consider looking at working with other districts to have our buses repaired when/if the bus lift is no longer able to be used.
- 23% of the people felt that we should look at replacing the current lift when/if it is no longer able to be used and place the new lift in the current facility.

The Board of Education and administration will continue to research and discuss different options and will use these results as one source of information to assist in this difficult decision.

Thank you again for those who completed the survey.
